

# California Proposition 65

May 2024, Version 1.0  
Previous version obsolete

## Applicable to: TIVAR® HPV FG UHMW-PE stock shapes

The **California Proposition 65 – Safe Drinking Water and Toxic Enforcement Act (version December 29, 2023)** requires manufacturers to provide a clear and reasonable warning about potential exposure to OEHHA listed substances from their products' intended or foreseeable use. Mitsubishi Chemical Advanced Material products and materials are sold as parts or semi-finished products not for direct use by consumers. OEHHA listed substances are neither intentionally introduced<sup>1</sup> during the production of the raw materials nor during the manufacture of the above mentioned Mitsubishi Chemical Advanced Materials parts and semi-finished products, with the exception as mentioned below. Mitsubishi Chemical Advanced Materials products may contain trace amounts of OEHHA listed substances bound within the polymer matrix. Any foreseeable exposure of listed substances to consumers, due to machining and final application of the Mitsubishi Chemical Advanced Materials parts and semi-finished products, and subsequent warning label requirements under California Proposition 65 must be determined by the manufacturer of the final product.

Since the presence of the above mentioned substances, with the exception as mentioned below, cannot reasonably be expected, Mitsubishi Chemical Advanced Materials does not systematically check their absence in its stock shapes by testing.

**⚠ WARNING:** This product can expose you to chemicals including **Titanium Dioxide** (CAS No. 13463-67-7), which is known to the State of California to cause cancer, and **n-Hexane** (CAS No. 110-54-3), which is known to the State of California to cause birth defects or other reproductive harm.
